

FH SCANDINOX A/S

– when project engineering combines new- and used processing equipment

The Danish engineering company, FH Scandinox, is busy working for dairy and food customers all over the world. One of the growing activity fields are installation of CIP systems and pre-manufactured mix-proof valve matrixes

Dairy, ice cream and other food manufacturers are under increasing pressure to provide a constant stream of new and imaginative top-quality products. At the same time, they must comply with heavy demands on sanitary solutions. FH SCANDINOX designs, engineers and supplies complete processing plants, and equipment for treating fresh raw milk or recombined milk into the different process applications and parameters. Expertise covers project management, plant installation, commissioning and after sales service. Dairy processing technology is designed and engineered to meet strict hygiene, food safety and quality standards, while operating efficiently and sustainably.

Efficient organization

- With 55 employees we are still a small actor in the food industry, but this means we have a very efficient and flexible organization, and most important we are very close to our customers. Thanks to our experience and know-how we are a serious and competent partner, who in

close co-operation with our customers, develops optimum solutions fully meeting the consumers' stringent requirements, says Torben From, Sales Director at FH SCANDINOX. The company has a broad cooperation with several suppliers of dairy equipment, so the customers can be assured, that the technical level is at top.

CIP and mix-proof valve matrixes

One of the growing activity fields are installation of CIP systems and also pre-manufactured mix-proof valve matrixes for any purpose in the process, which do have high attention.

- Our CIP systems are designed to ensure optimal cleaning. Depending on the customers' requirements, we install central or decentralized systems or a combination of both. We are also able to pre-manufacture complete CIP units in our workshop, says the Sales Director.

- Our mix-proof valve matrixes are the optimal state-of-the-art solution for the liquid media flow in fully-automatic

Torben From

dairy and food processing plants. Manifold flow can thus be realized in a clearly arranged form in a relative small space. Our valve matrixes are individually developed by our engineering team, suitable for the respective processes and to meet the customers exact requirements, says Torben From.

Growing in margarine

The dairy industry is a main work area for FH SCANDINOX, but also margarine production is an very important work area. In 2018, the company acquired 75 pct. of the shares in Gerstenberg, who has more than 100 years of know-how in equipment and services within the margarine industry.

- We are convinced that this new initiative will not only be of great benefit to our existing customers on the international market but also make new potential customers enthusiastic. Our common vision is to be the preferred

FH Scandinox pre-manufacturing a complete CIP plant in the workshop.

Second-hand Equipment

With one of Scandinavia's largest stocks of used processing equipment for the dairy and food industries, FH SCANDINOX A/S can supply a wide range of:

- Stainless steel storage and processing tanks
- Homogenizers
- Separators
- Plate heat exchangers
- Butter processing equipment
- Margarine processing equipment
- Packing and filling machines
- Pumps
- Valves, etc.

We can rebuild and meticulously test used processing equipment in our workshop prior to delivery.

supplier to the margarine industry with new technology, and we believe there will be a positive synergy to our dairy activities as well, says Torben From.

Dismantling and used

Another important area is dismantling and sale of used dairy- and food processing equipment.

- We have lot of experience working for the biggest companies in Europe. This includes dismantling of complete plants or smaller production lines, which often is re-installed at a new customer

with different upgrades of the involved technology, says Torben From.

Among the customers are Arla Foods, TINE Dairy Norway, MILLS Norway, FOODMARK Sweden, Puratos Belgium, who make use of the FH Scandinox experience in dismantling and selling used equipment.

FH SCANDINOX

About FH SCANDINOX

- 40 years of experience and know-how within sale, engineering, manufacture, erection and running-in of complete processing plants and equipment worldwide.

- 3 divisions in Denmark, 2 placed in Jutland and 1 placed in Copenhagen. Plus subsidiary in Norway and China.

- Engineering department with skilled technicians endeavor, who always provide a satisfactory solution in terms of quality, hygiene, function and economy.

- Own erection department and a workforce of committed and highly experienced and flexible fitters, all experts in stainless steel.

- All field engineers have certificates in stainless steel TIG welding.
